OBJECTIVES

Quick-learning developer actively seeking a full-time role, ready to contribute from day one and collaborate with proactive, high-energy teams.

EDUCATION

DEC in Computer Science Technology - Programming

Montreal, QC

LaSalle College

Jan 2023 - May 2025

PROJECTS

THREE OF US FOR GERMAN SHEPHERDS FOUNDATION

TS, Firebase, HTML, SCSS, Bootstrap

September 2024 - Present

- Architected a bilingual content model (field-level localization) to replace JSON string switching; site auto-detects language and pulls the correct fields.
- Built a full admin dashboard so non-technical users can update content without redeploying; changes go live in real time via the database.
- Delivered direct-to-owner form delivery with anti-spam using templated emails and validation hardening.

FAST FOOD DELIVERY WEB APPLICATION

React, React Bootstrap, SQL Server, C#

Jun - Jul 2024

- Designed and developed 6+ front-end components from scratch for user and account management using React.
- Implemented API integration to fetch and display data for orders, feedback, and account details.
- Collaborated with 3 teammates to plan the project and manage expectations, ensuring clear communication and effective project management.

PODCAST LANDING PAGE

React, Vite, Emotion, Framer Motion

Mar - Apr 2024

- Designed a focused landing experience with episode listings, descriptions, and lightweight interactivity for quick content discovery.
- Developed a structured program architecture to maintain clear separation of concerns and enhance code maintainability.

LANGUAGES

- **French:** Intermediate
- **English:** Fluent
