Summary

Recent Computer Science graduate with experience building web and mobile applications through internships and academic projects. Strong foundation in software development, databases, cloud technologies, and Agile collaboration. Eager to contribute, learn new technologies, and grow within a professional development team.

Education

DEC in Computer Science Technology - Programming, LaSalle College, Montreal, QC *Jan 2023 – July 2025*
GPA: 3.86/4.0

Work Experience

Software Development Intern, [Three of Us German Shepherds Foundation](#)  *Sep 2024 – Jun 2025*

- Designed and delivered a scalable full-stack admin dashboard with secure role-based access, supporting 8 operational areas and real-time data management using Firebase.
- Improved operational efficiency by 85% by centralizing data in Firestore and implementing validation, live previews, and optimized data workflows.
- Re-engineered localization from react-i18next JSON dictionaries to database-driven bilingual fields, enabling instant language switching without reloads.
- Collaborated in Agile sprints through task estimation, sprint planning, code reviews, and feature delivery within project deadlines.
- Tools:** TypeScript, React, Firebase Firestore, Firebase Storage, Firebase Auth, SCSS, Bootstrap, Vercel, Git/GitHub, EmailJS, Google Analytics

Projects

Fast Food Delivery Web Application *Front-End Developer* *Jun – Jul 2024*

- Designed and developed 6+ reusable React components for user registration, login, and role management.
- Integrated REST APIs to retrieve and display orders, user accounts, and customer feedback with responsive UI.
- Created Postman test collections to validate authentication, order management, and feedback endpoints.
- Collaborated within a four-member team using Git-based workflows to deliver product on schedule.
- Tools:** React, React Bootstrap, SQL Server, C#, Postman

Car Rental Management Application *Full-Stack Developer* *Oct – Dec 2024*

- Designed and developed an Android car rental application featuring role-based authentication, booking, contract management, and user administration using Firebase.
- Implemented Stripe Checkout through a lightweight Node.js service to process and verify payment transactions.
- Integrated Google Calendar and Maps APIs to automate booking reminders and provide pickup location support.
- Tools:** Android (Java/XML), Firebase Auth/Storage, Stripe API, Google APIs, Gradle

Certifications

ITIL 4 Foundation (in progress) *Expected Completion: 2026*

Technical Skills

Systems & IT Tools: Office 365, PowerShell, Azure, Windows/Linux Administration

Frontend: React, TypeScript, HTML5, CSS/SCSS, Bootstrap, Swift, SwiftUI, Figma

Backend: Java, Spring Boot, C#, .NET, Node.js, Python

Databases & Cloud: MySQL, SQL Server, Oracle, MongoDB, Firebase, AWS (EC2, S3)

DevOps & Tools: Git/GitHub, GitLab, Jenkins (CI/CD), Docker
