Ho Chi Minh City, Vietnam | chtuanh@gmail.com | (+84) 938 362 605

[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Technical Skills

Languages: Java, C#, Python, JavaScript, TypeScript, SQL

Backend & Frameworks: Spring Boot, Spring Data JPA, Hibernate/JPA, ASP.NET MVC, .NET, Node.js, REST APIs

Databases & Cloud: SQL Server, MySQL, Oracle, MongoDB, Cloud Firestore, Firebase Storage

Development & DevOps: Git/GitHub, Maven, Gradle, Postman, Docker, PowerShell

Frontend: React, HTML5, CSS/SCSS, Bootstrap

Education

Diploma of College Studies (DEC), Computer Science Technology – Programming

Jan 2023 – Jul 2025

LaSalle College, Montreal, QC, Canada

GPA: 3.86/4.0

Work Experience

Software Development Intern, Three of Us For German Shepherds Foundation

Sep 2024 – Jun 2025

[Live Website](#) | [Admin CMS GitHub](#) | [Project Demos](#)

- Engineered a React/TypeScript content-management system backed by Cloud Firestore and Firebase Storage, replacing hard-coded website content with administrator-managed data across Home, Adoption, Fostering, Donations, Sponsors, Volunteers, About Us, and pet listings.
- Designed typed content models and reusable Firebase service layers for CRUD operations, supporting section-specific validation, bilingual English/Hungarian data, nested structures, and dynamic website rendering.
- Implemented media-management workflows that upload files to Firebase Storage, persist download URLs in Firestore, support multi-image records, preview content before publishing, and synchronize image deletion with stored data.
- Implemented adoptable-pet data access with Firebase server timestamps, ordered queries, cursor-based pagination, multi-image records, and publish/unpublish controls.
- Integrated Firebase Authentication, protected administrative routes, reCAPTCHA-protected forms, EmailJS workflows, and consent-based Google Analytics loading.

Projects

Job Portal REST API – Backend Developer

2026 – Present

- Developing a RESTful backend with Java and Spring Boot using layered Controller, Service, Repository, DTO, Mapper, and Entity components, with Spring Data JPA and Hibernate for persistence and database-backed operations.
- Added versioned REST endpoints and configurable API routing while testing request and response behavior through Postman.
- Technologies:** Java, Spring Boot, Spring Data JPA, Hibernate, Maven, H2, REST, Postman

Property Rental Management System – Backend / Full-Stack Developer

2025

[GitHub Repository](#)

- Developed a multi-role property management system with ASP.NET MVC and Entity Framework, supporting Owner, Manager, and Tenant workflows, session-based access, CRUD operations, property search, appointments, and messaging.
- Modeled relational data in SQL Server for users, buildings, apartments, appointments, events, and messages using Entity Framework Database First.
- Technologies:** C#, ASP.NET MVC, Entity Framework, SQL Server, LINQ, HTML/CSS

Car Rental Management Application – Java / Mobile Developer

Oct – Dec 2024

[GitHub Repository](#)

- Built an Android/Java rental application supporting customer and admin workflows for authentication, vehicle management, bookings, rental contracts, payments, and user administration.
- Integrated Firebase Authentication and Storage, Stripe payment processing through a Node.js service, and Google Calendar API scheduling; persisted calendar event IDs with rental contracts while allowing bookings to complete when calendar authorization or event creation failed.
- Technologies:** Java, Android/XML, Firebase, Node.js, Stripe API, Google APIs, Gradle
